

Six Sigma Approach to Managing Risk, Legend, Myth or Fact?

Whether you fly a 787 or just an AirTrike or anything in between, you know that safe flying is paramount, but that doesn't have to mean that it can't and isn't also a lot of fun. We'll discuss best practices and standard operating procedures for a variety of VFR/IFR flight situations and scenarios with a realistic perspective and not just FAA "textbook" answers.

Directions: US-101 exit Tully Ave. north bound to Capital Expressway west bound left at Cunningham Ave. Terminal Building and parking are straight ahead adjacent Tradewinds Aviation.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
